PLANTATION JOURNAL OF STRIP PLANTATION

"Sustainable Forest & Livelihood (SUFAL) Project"

Basic Information:

- | | | |
|----|--------------------------------|---|
| 1 | District | : Noakhali |
| 2 | Forest Division | : Coastal Forest Division, Noakhali. |
| 3 | Upazila | : Noakhali Sadar |
| 4 | Center | : Maijdee SFNTC |
| 5 | Union | : Kadirhanif, Newajpur, Awshadia & Darmapur Union Parishad. |
| 6 | Project | : Sustainable Forests & Livelihoods (SUFAL) Project. |
| 7 | Area | : 25.0 Seedling Kilometers. |
| 8 | Place | : a) Nittanandapur, Jahanabad, Machimpur, Bakterpur, East Shullakia, Darmapur & Batterteak Mujja. |
| 9 | Species | : Jhaw, Amlaki, Horitaki, Bohera, Shimul, Mango, Kalo Jam, Raintree, Koroi, Arjun, Neem, Guava, Jackfruit, Mehagoni, Akashmoni, Babla, Krisnachura, Jarul, Gammer etc. |
| 10 | No. of seedlings | : 25,000 (Twenty five Thousand). |
| 11 | No. of Participants | : 257 beneficiaries selected as per Social Forestry Rules-2004 (as amended till 2011) and Approved by Noakhali Sadar Upazila Environment & Forest Committee. |
| 12 | Site Selection Criteria | : The plantation site is selected through the meeting with UP Chairman, UP Members and other local Elites. In that meeting BFD Officials inform to the attendees about the suitability, essentiality and vitality of the sub-project. This site is not only selected for economic, social value but also for global environmental climate change mitigations options in reducing global weather patterns on broad perspectives. |

- 13 **Species selection** : When the best possible information has been collected on the characteristics of the site to be planted, the next step is the selection of the tree species to plant. The aim is to choose species which are suited to the site, will remain healthy throughout the anticipated rotation, will produce acceptable growth and yield, and will meet the objectives of the plantation (fuel wood production, protection, etc.).
- 14 **Time of planting** : The planting season (June) generally coincides with the rainy season; usually, planting is started as soon as a specified quantity of rain has fallen. This amount of precipitation must be judged on the basis of local knowledge. Planting can also be initiated when the soil is wet to a specified depth (approximately 20 centimeters).
- 15 **Edaphic Condition** : The plantation site is a rustic/pastoral/rural. Soils are mainly grey to olive, deep, silt loams. Organic matter contents are medium Newly constructed road by Roads & Highway.
- 16 **Topography** : Slopes on one sides of the road where rainwater does not accumulate and there is no difficulty in moving vehicles along the road which is suitable for planting
- 17 **Soil structure** : Sandy loam soil
- 18 **Climate Condition** : The climate of Noakhali is largely tropical and humid. Noakhali is known as a coastal district while the climate variations are often hazardous and devastating. Naturally, the maximum rainfall occurs and number of rainy days occurs in July and August (698.7 mm. On the other hand, highest rainfall occurs 2691 mm in monsoon (June, July, August and September). After the post monsoon (October and November), the rainfall drops down to average 1459 mm. In addition, the temperature of Noakhali is mild pattern. May is the hottest temperature up to 31.9 ° C and January is the lowest temperature up to 14.9 ° C.

19 **Planting
method**

- 8 The plantation site is a rural plain road and it is connected to the main road. The road is famous for the name of Roads on Both side of Bashkhali Khal (Ibrahim Contractor's home to Anam near home) & UP road to Ibrahim Mowlavir Dokhan. South Jagdananda, Dhanshiri Union, Kabirhat, Noakhali. The road is surrounded with arable/ agricultural, human settlements while scattered trees are seen/existed. On the month of June, both sides of the road's bushes have been cleaned to make suitable for the plantation. On the same month, Arhar has also been given with a view to support the seedlings by making line at both sides of the road. On the following month, pits have been done with the size of 30cm×30cm×30cm keeping distance in between pits 2m. Moreover, mixed Cow dung and Chemical Fertilizer put into the pits according to the SUFAL Manual's land preparation for the plantation. For raising strip plantation, 10,000 (Ten thousand) matured seedlings of several species such as Jhaw, Amlaki, Horitaki, Bohera, Mango, Kalojam, Gouva, Akashmoni, Arjun, Mehogony, Chikrashi, Kishnachura, Bokain, Gamar, Amra, Jack Fruits, Neem etc. have been planted in the nourished/prepared pits. After that, 5 fit size sticks put in the soil which are tied by the rope with the seedlings. Since, there are the chances of grazing and other unavoidable harmful activities, a number of Watchers have been appointed to tackle the plantation site from damage and deterioration. Besides, selected beneficiaries and field level staff of the Forest Department are also looking after the plantation site. An Agreement between the Forest Department acting on behalf of The Government of the People's Republic of Bangladesh (1st Party) and Land Owning Agencies (2nd Party) and Group of Local Participants-Selected Beneficiaries (Third Party) is or will be done. Furthermore, a committee will also be formed within the plantation site from the selected beneficiaries to make sustainable of the ongoing 10 Seedling Km Strip Plantation.

21. Name & Designation of the Officers & stuffs Involved in the Plantation Raising Activities:

- A. Mr. Md. Farid Meah, DCF.
- B. Mr. Kazi Tariqur Rahman, ACF.
- C. Mr. Sheikh Md. Kamruzzaman, Forester, Officer-in-Charge.
- D. Mr. Musle Uddin, SBD.
- E. Mr. Md. Shajahan, Forest Gurd.
- F. Mr. Makluker Rahman, Plantation Mali.

22. Signature of the officers Involved in the Raising Plantation Activities :

Sl.	Name	Designation	Signature
01	Mr. Sheikh Md. Kamruzzaman, Forester	Officer-in-Charge Maijdee SFNTC Coastal Forest Division Noakhali.	 Sheikh Md. kamruzzaman Officer in-Charge, Maijdee SFNTC Coastal Forest Division, Noakhali.
02	Mr. Kazi Tariqur Rahman, Assistant Conservator of Forests.	Assistant Conservator of Forests Noakhali Zila Coastal Forest Division Noakhali.	 Kazi Tariqur Rahman Assistant Conservator of Forests Coastal Forest Division, Noakhali.
03	Mr. Md. Farid Meah DCF.	Divisional Forest Officer Coastal Forest Division Noakhali.	 (Md Farid Meah) Deputy Conservator of forests Divisional Forest Officer Coastal Forest Division, Noakhali.

EXPENDITURE SHEET

Center : Maijdee SFNTC, Coastal Forest Division, Noakhali.
 Project : Sustainable Forests & Livelihoods (SUFAL) Project.
 F.Y. : 2022-2023, Area : 25.0 Seedlings Kilometer.

Vr. No.	Month	Particulars	Amount	NBP
5/Maij	June/2023	Daily labors (Participants) were engaged from 01/06/2023 to 30/06/2023 (June-2023) at Maijdee SFNTC for Survey the plantaiton site & prepare plantation site map and Post planting survey and making of map GPS readings at every turn along the boundary of the plantation site need to be noted on the plantation journal, Cutting of bushes to be done by participants, Layout by participants, Arhar seeds collection and sowing of Arhar including hoeing, Stacking including fastening of seedlings with stack by shootly, pit making, leave the pits open for about 2 weeks, procure compost or decomposed cowdung, 0.5 kg per pit, mix these manures properly with the soil in the pit, pulverize the soil, mix it with compost remove all debris, root pieces, plalnt the seedlings by taking off the bags carefully, transportation to the planting site, Application of nitrogenous fertilizer after two month of planing, post planting survey and making of map & fixing of a RCC plantaion board etc 25.0 Seedling Kilometers Strip Plantation in 2022-2023 under Sustainable Forest and Livelihoods (SUFAL) Project.	1,80,000/-	
6/Maij	June/2023	Daily labors (Participants) were engaged from 01/06/2023 to 30/06/2023 (June-2023) at Maijdee SFNTC for Survey the plantaiton site & prepare plantation site map and Post planting survey and making of map GPS readings at every turn along the boundary of the plantation site need to be noted on the plantation journal, Cutting of bushes to be done by participants, Layout by participants, Arhar seeds collection and sowing of Arhar including hoeing, Stacking including fastening of seedlings with stack by shootly, pit making, leave the pits open for about 2 weeks, procure compost or decomposed cowdung, 0.5 kg per pit, mix these manures properly with the soil in the pit, pulverize the soil, mix it with compost remove all debris, root pieces, plalnt the seedlings by taking off the bags carefully, transportation to the planting site, Application of nitrogenous fertilizer after two month of planing, post planting survey and making of map & fixing of a RCC plantaion board etc 25.0 Seedling Kilometers Strip Plantation in 2022-2023 under Sustainable Forest and Livelihoods (SUFAL) Project.	1,26,000/-	
		Expenses incurred by contractor for the supply of various materials -----	1,66,500/-	
Total =			4,72,500/-
