Raising Strip Plantation of 10.0 Seedlings Kilometers in Financial Year 2021-2022 under SUFAL Project.

The people of Bangladesh, a densely populated country, depend heavily on forests for fuel wood, timber and other subsistence. Due to huge biotic and abiotic pressure, forest resources of the country have been depleted greatly. Participatory social forestry was introduced in Bangladesh in early 1980s to reduce the rampant rate of deforestation. Social forestry, involving local people in a benefit-sharing mechanism, has been introduced to Bangladesh as a remedy to stop rampant deforestation. This added income is a significant contribution to local monetary resources and improves the socioeconomic conditions of the poor. It is found that individuals recognized as encroachers in the past, have now become vital stakeholders of forests and recognized member in community. The application of social forestry practices to strip plantations in Bangladesh could be a key factor in significantly reducing poverty and could also stem the rising tide of forest resource losses.

Basic Information:

- 1 **District** : Noakhali
- 2 **Forest Division** : Coastal Forest Division, Noakhali.
- 3 **Upazila** : Kabirhat
- 4 **Center** : Kairhat Upazila SFPC
- 5 **Union** : Ghoshbag & Dhanshalik Union.
- 6 **Project** : Sustainable Forests & Livelihoods (SUFAL) Project.
- 7 **Area** : 10.0 Seedling Kilometers.
- 8 **Place** : Char Algi Rastar Matha to Dhanshalik Bazar.
- 9 **Species** : Jhaw, Amlaki, Horitaki, Bohera, Shimul, Mango, Kalo Jam, Raintree, Koroi, Arjun, Neem, Guava, Jackfruit, Mahagoni, Akashmoni, Babla, Krisnachura etc.
- 10 **No. of seedlings** : 10,000 (Ten Thousand).
- 11 **No. of Participants** : 107 beneficiaries selected as per Social Forestry Rules-2004 (as amended till 2011) and Approved by Kabirhat Upazila Environment & Forest Committee.
- 12 **Site Selection Criteria** : The plantation site is selected through the meeting with UP Chairman, UP Members and other local Elites. In that meeting BFD Officials inform to the attendees about the suitability, essentiality and vitality of the sub-project. This site is not only selected for economic, social value but also for global environmental climate change mitigations options in reducing global weather patterns on broad perspectives.

Coastal Forest Division, Noakhali.

- 13 **Species selection** : When the best possible information has been collected on the characteristics of the site to be planted, the next step is the selection of the tree species to plant. The aim is to choose species which are suited to the site, will remain healthy throughout the anticipated rotation, will produce acceptable growth and yield, and will meet the objectives of the plantation (fuel wood production, protection, etc.).
- 14 **Time of planting** : The planting season (June) generally coincides with the rainy season; usually, planting is started as soon as a specified quantity of rain has fallen. This amount of precipitation must be judged on the basis of local knowledge. Planting can also be initiated when the soil is wet to a specified depth (approximately 20 centimeters).
- 15 **Edaphic Condition** : The plantation site is a rustic/pastoral/rural. Soils are mainly grey to olive, deep, silt loams. Organic matter contents are medium. Newly constructed road by Roads & Highway.
- 16 **Topography** : Slopes on one sides of the road where rainwater does not accumulate and there is no difficulty in moving vehicles along the road which is suitable for planting.
- 17 **Soil structure** : Sandy loam soil
- 18 **Climate Condition** : The climate of Noakhali is largely tropical and humid. Noakhali is known as a coastal district while the climate variations are often hazardous and devastating. Naturally, the maximum rainfall occurs and number of rainy days occurs in July and August (698.7 mm). On the other hand, highest rainfall occurs 2691 mm in monsoon (June, July, August and September). After the post monsoon (October and November), the rainfall drops down to average 1459 mm. In addition, the temperature of Noakhali is mild pattern. May is the hottest temperature up to 31.9 °C and January is the lowest temperature up to 14.9 °C.

19 **Planting method**

8 The plantation site is a rural plain road and it is connected to the main road. The road is famous for the name of Char Algi Raster Matha to Dhanshalik Bazar of Ghoshbag & Dhanshalik Union, Kabirhat, Noakhali. The road is surrounded with arable/ agricultural, human settlements while scattered trees are seen/existed. On the month of June, both sides of the road's bushes have been cleaned to make suitable for the plantation. On the same month, Arhar has also been given with a view to support the seedlings by making line at both sides of the road. On the following month, pits have been done with the size of 30cm×30cm×30cm keeping distance in between pits 2m. Moreover, mixed Cow dung and Chemical Fertilizer put into the pits according to the SUFAL Manual's land preparation for the plantation. For raising strip plantation, 10,000 (Ten thousand) matured seedlings of several species such as Jhaw, Amlaki, Horitaki, Bohera, Mango, Kalojam, Gouva, Akashmoni, Arjun, Mehogony, Chikrashi, Kishnachura, Bokain, Gamar, Amra, Jack Fruits, Neem etc. have been planted in the nourished/prepared pits. After that, 5 fit size sticks put in the soil which are tied by the rope with the seedlings. Since, there are the chances of grazing and other unavoidable harmful activities, a number of Watchers have been appointed to tackle the plantation site from damage and deterioration. Besides, selected beneficiaries and field level staff of the Forest Department are also looking after the plantation site. An Agreement between the Forest Department acting on behalf of The Government of the People's Republic of Bangladesh (1st Party) and Land Owning Agencies (2nd Party) and Group of Local Participants-Selected Beneficiaries (Third Party) is or will be done. Furthermore, a committee will also be formed within the plantation site from the selected beneficiaries to make sustainable of the ongoing 10 Seedling Km Strip Plantation.

21. Name & Designation of the Officers & stuffs Involved in the Plantation Raising Activities

- A. Mr. Md. Farid Meah, DCF.
- B. Mr. Kazi Tariqur Rahman, ACF.
- C. Mr. Md. Mosharrof Hossain, Forester, Officer-in-Charge.
- D. Mr. Abul Kashem-, Forest Guard.
- E. Mr. Tapan Chandra Das, Forest Guard.
- F. Mr. Md. Shahid Ullah, Plantation Mali.
- G. Mr. Md. Habib Ullah, Plantation Mali.
- H. Mr. Md. Belal Uddin, Plantation Mali.

22. Signature of the officers Involved in the Raising Plantation Activities :

Sl.	Name	Designation	Signature
01	Mr. Md. Mosharrof Hossain, Forester	Officer-in-Charge Kabirhat Upazila SFPC Coastal Forest Division Noakhali.	 Md. Mosharrof Hossain Officer-in-Charge Subarnachar Upazila SFPC Coastal Forest Division, Noakhali.
02	Mr. Kazi Tariqur Rahman, Assistant Conservator of Forests.	Assistant Conservator of Forests Noakhali Zila Coastal Forest Division Noakhali.	 Kazi Tariqur Rahman Assistant Conservator of Forests Coastal Forest Division Noakhali.
03	Mr. Md. Farid Meah DCF.	Divisional Forest Officer Coastal Forest Division Noakhali.	 Md. Farid Meah Divisional Forest Officer Coastal Forest Division Noakhali.

INSPECTION SHEET

Project : Sustainable Forests and Livelihoods (SUFAL) Project.

Type of Plantation : Strip Plantation.

Area : 10.0 Seedlings KM.

No. of Seedlings : Planting 10,000 Seedlings, FY: 2021-2022

Inspected By : Mr.

Date	Description	Remarks
14.9.2022	Visited the plantation at Kabirhat SFPC, Total area of the plantation is 10 SKM. Species found are, Teak, Amlaki, Mehgani, Krimaphora, Shimul, Nmr, Arjun, Rain tree, Dohera, Jam. Jack fruit, Kath Badam, tentul etc. The present condition of the plantation is very good. Survival % of the seedlings is 98% and av. ht. of the seedlings are is 4'-0". During inspection, DFO, Noakhali Coastal afforestation Div, ACF Noakhali district, ACF Laxmipur district, Range Officer, and other staffs were present. Advised to upkeep the satisfactory condition of the plantation.	
28.10.22	With DFO, Coastal Forest Div, Noakhali ACF and other staff the plantation work of 10 km under Kabirhat SFPC visited today. Survival rate & health of seedlings is satisfactory. Weeding work, maintenance & gap filling works should be done in time so that it will be finally a very good plantation work.	

Kabirhat SFPC, Coastal Forest Division, Noakhali.
